## CHANGE OF NAME/ADDRESS OR OWNERSHIP

Regulations require the owner of a water right to directly notify the State Water Resources Control Board (State Water Board) with information regarding either a change in the name and/or address of the current water right holder or a change in ownership of the water right (Cal. Code Regs., Title 23, §830-831). All correspondence pertaining to a water right, including the bill for fees, is mailed to the owner (or agent) of record at the most recent address supplied to the State Water Board. Until such time as the State Water Board is notified of a change in ownership, the owner of record is liable for all fees and related charges assessed to the billing account.

To inform the State Water Board of any updates to the name or address of the current water right holder, please complete Box 1 and return this form to the Division of Water Rights at the address above. To inform the State Water Board of a change in ownership of a water right, please complete Boxes 1 and 2. If there are joint owners of this water right, you must provide the names and addresses of all joint owners and designate one person to receive all correspondence from the State Water Board regarding the joint application (Water Code, § 1290; Cal. Code Regs. Title 23, § 691.) For multiple owners, please attach additional sheets as necessary.

### Box 1: Current or New Owner: (complete for Change of Name/Address or Change of Ownership)

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

RIPARIAN Right by Judgement of Lake County  
Superior Court March 28-1913

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

August 4, 1989

Dear Gunning Creek Water User:

At our meeting on June 7 at the Freeport-McMoRan Field Office, some of you were concerned what impact the new water system would have on your existing water rights and on your reporting requirements. I told you that I would be contacting the State Water Resources Control Board to have the Board answer your questions.

The Board response is enclosed for your review. As you can see, the new point of diversion at the spring box above the Plessas property will not affect your existing water rights. Freeport-McMoRan has obtained an easement from Plessas to install a pipe to this new location. You will need to report this new point of diversion on your 3-year reporting forms when those forms are due.

If you have any questions, my new work phone is (707) 252-9000.

Very truly yours,

  
James W. Laughlin
